

Will The ISIS II Fit My Semi Auto?

To check maximum length available, *add* distance from end of stock to end of stock bolt (A) to thickness of pad (B).

Compare with overall size of Standard ISIS II or Semi-Auto ISIS II.
(From end of shock absorber to face of pad)

Standard ISIS II *with* 11mm **Green** pad = 102mm

Semi-Auto ISIS II *with* 11mm **Green** Pad = 86mm

(Use standard unit where possible)

NB. Shock Absorber must *not* make contact with stock bolt.
